

What?

Micro-Credentials as a powerful tool for curriculum design

Blended Intensive Program 2024 Sustainability Learning in New Formats

When and where?

online period
September-December 2024 with
in-presence period
September 23-27
@ATU in Sligo, Ireland

APPLY NOW

Why?

Micro-credentials have gained wide attention in educational practice. They open opportunities to widen participation of hard-to-reach target audiences and thus help increase the inclusivity of education. Being able to design micro-credentials is thus an essential competence for future educationalists. The learning activity aims to familiarise students with pedagogical and didactical implications of the development of micro-credentials in the field of education for sustainability.

Who?

Students with an interest in innovative teaching and learning formats at Master's level

5 Workshops

- Embedding sustainability in the curriculum
- Exploring micro-credentials as a mode of delivery
- Active citizenship: micro credentials as a means of engagement
